Var:-

int ,

String,

num,

double,

bool

const

list for it we use:- var list1=["ram","shamr"];

example:-

void main() {

int n = 0;

num o = 23.4;

String name = 'ram ';

var list=["ram","sham","mohan"];

list.forEach((nu){

print(nu);

});

functions use there

we use $ instead of+ for adding varible in it

(" $name $num");

for chenking type of variable:- var. runtimeType

if else and switch are same
